(Suits trough) Angled back
Order Code: BUB224NCBF

“Do you remember playing in the school yard and not wanting to miss a moment of the action?”

A quick drink from the bubbler was what we did, and what kids have been doing with Enware bubblers for 80 years”

NOTE: A general reference point for a child’s ability to activate a push button on a drinking fountain or water cooler is the Australian Design Standard for Access and Mobility AS1428.2. Table 6.

Drink or Fill?

Enware's Blueline™ bubbler's are also available with an integrated bottle filler, an important consideration for schools as it allows children to fill their water bottles to stay hydrated throughout the day. Turn one way to drink, the other to fill. Clearly labelled even in braille, makes the Blueline™ easy to use for everyone.

KEY FEATURES AND BENEFITS

- Gentle turn one way for drinking and the other way for bottle filling
- Easy to understand instructions including braille for people who are visually impaired
- T bar design supports kids to keep their balance while drinking
- Consistent flow height for easy use
- Bright chrome finish for ease of cleaning to maintain good hygiene
- Soft and safe, bacteria preventive mouthpiece to protect teeth
- Long lasting and easy to maintain ceramic cartridge and gauze covered spout to prevent objects entering
- Flange with dual fixing points for anti-rotation
- Sand proofed mechanism designed for smooth operation and long product life

Enware has been designing and manufacturing spring-action tapware and bubblers since 1937. Made to last and designed to save water and reduce ongoing maintenance in challenging environments such as schools and local public areas, with barrier free models also available for wheel chair users.
