HEAVY DUTY
FIT FOR PURPOSE
PERFORMANCE AND EFFICIENCY

- Pre-Rinse Assemblies
- Hands Free Foot & Knee Operated Tapware

pre-rinse assemblies

Built tough for the demands of busy commercial kitchens where performance and reliability is crucial. Enware's Pre-Rinse Units incorporating Ultra-Rinse provide a wide range of options to suit your kitchen requirements.

Choose from wall or bench mounted configurations, with optional pot fillers for practical use of your sink area.

FEATURES:

- Proven durability in some of Australia's leading restaurants and fast food stores
- Moulded rubber nozzle guard helps reduce the risk of damage from accidental knocks
- Easy to use, ergonomic handle design
- Chisel style spray pattern rapidly removes the food excess for less time spent at the sink
- High water efficiency, reduces water costs and the energy costs for heating the water
- Self-closing trigger spray turns off water when not in use
- Stay open ring keeps spray on for easier prolonged use

WaterMark
AS/NZS 3718 WMKA 1583
SAI Global

Enware Tapware is manufactured to the exacting WaterMark standard AS/NZS3718 and AS4020.

- Dual check valve for backflow prevention
- Premium quality hose, brass and stainless steel to give you maximum strength and dependability
- Modular design can easily be configured to meet your specific needs
- Australian made so parts are always available for an even longer serviceable life.

enware's ultra-rinse pre-rinse spray

Designed and manufactured in Australia to achieve an impressive 6-Star water efficiency rating, the Ultra-Rinse incorporates advanced technology in its easy to use ergonomic design.

The superior high-velocity spray pattern cleans faster and uses less water: with the 6-Star WELS rating reflecting a flow rate of just four litres per minute, significant water-heating energy savings are an added bonus.

water efficiency

POT FILLER WITH MANUAL SHUT-OFF

Pot Filler supplied with a 3 star (8lpm) water efficiency rating.

ULTRA-RINSE PRE-RINSE SPRAY

WELS 6 Star (4lpm) water efficiency rating.

technical information

Minimum–Maximum Working Pressure (AS/NZS 3500)*	50-500kPa
Maximum Static Pressure	1200kPa
Maximum Working Temperature	90°C

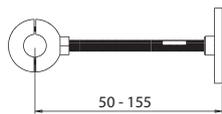

For optimum performance it is recommended that the control valves or taps be turned off when not in use overnight or for long periods. Complete pre-rinse assemblies incorporate a dual check valve for backflow prevention. Lever tapware control incorporate quarter turn non-rising jumper valves. *Enware products are to be installed in accordance with AS/NZS3500.

pre-rinse assemblies – options and parts

Enware's modular design and Australian manufacturing means we can easily customise our products to meet specific application requirements. This section is provided as a guide to the options available and our customer service team can help with your special requirements.
