Slimline 2 Way Pendant Laboratory Tap

LCN119B

Enware's Slimline laboratory outlets are supplied with a tapered tube nozzle and are assembled for each specific media type.

Activation methods include a needle valve, for accurate adjustment or a push-to-turn valve with visual on/off indication.

The durable powder coat finish gives significant protection against corrosion, discolouration and surface damage.
Slimline handles are ergonomically designed for precise feel and finger tip control. Handles are colour coded for easy service identification and use complimentary buttons.
